TECHNICAL MEMORANDUM

TO: Water Development Commission

DATE: February 23, 2011

FROM: Chace Tavelli, P.E.

REFERENCE: Bear River Basin Plan Update, 2011

SUBJECT: Use of Bear River Spreadsheet Model – *Tab VII (2011)*

Contents

1.0 Model Version Selection..... 1

1.0 Model Version Selection

Three spreadsheet models were constructed for the 2001 Bear River Basin Plan to determine water availability based on dry, wet and average conditions within the basin. The explanation of those models can be found in the original technical memorandum (http://waterplan.state.wy.us/plan/bear/techmemos/modeldvpt/modeldvpt_memo.html). For this plan, only the Archived model was updated.
